Windows 11 hotpatch calendar

View a calendar of hotpatch updates for Windows 11. With hotpatching, devices receive a baseline cumulative update the first month of each quarter in the calendar year. A restart is required to install that baseline update. During the next two months, devices receive a hotpatch update, which includes only security updates and can be installed without a restart. For details on what is included in each update, see the Release notes for hotpatch on Windows 11, version 25H2 Enterprise clients and Release notes for hotpatch on Windows 11, version 24H2 Enterprise clients.
